

College Experience Day

Dear Educator,
Would your students like a preview of college?

DBCC invites students to attend college for a day and attend classes. They will actively engage in various subjects such as culinary arts, health science, science, math, criminal justice, English, education, psychology, & mini-seminars for student success, career exploration, or college preparation.

The Advanced Technology Center also hosts field trips offering robotics, digital media, drafting, general automotive repair and collision repair.

College Experience Day is generally scheduled for the day, with students returning to their high school in time to meet on the school bus.

- ◆ DBCC professors will also visit your classroom and provide guest lectures related to your subject or other topics of your choosing.

Please review out the classes currently available for CED or guest lectures. Then, please contact Professor Richard Tamburro, tamburr@dbcc.edu or Professor Walter Saviuk, saviukw@dbcc.edu.

DBCC welcomes your participation, Thank you.
